

Wood working Industry

AIRCOM Technologies has been involved in this market since 1998. Our ability to select and apply the correct equipment for the wood working industry applications is based on technical knowledge and a complete range of products. Please call us to review your project requirements.

Liquid Ring Vacuum Pumps

A Gardner Denver Product

These compact and quiet vacuum pumps are cool running, maintenance free, oil free and have a self-contained internal water circuit. Easy to install; simply plug it in to a power source and it's ready to run! Capacity range from 20 to 150 cfm; generating 28.5 in. of HgV.

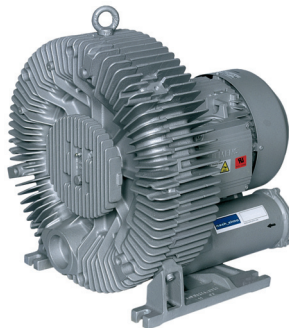

Claw vacuum pumps

A Gardner Denver Product

ZEPHYR

These high efficiency, dry and frictionless compression claw vacuum pumps are low maintenance and contain an integrated air cooling without additional cooling medium. These are the perfect choice for vacuum packaging applications. Capacity 72-600 m³/hr (42.4-353 cfm) at 60 Hz, continuous vacuum up to 100 mbar (abs.) / 27.0 in.HgV.

Regenerative blowers

A Gardner Denver Product

These compact and quiet blowers are applied for flow rates below 800 cfm and pressures below 13 psig. Flow is easily controlled with speed.

We offer on site and in house repair, maintenance contract, system optimization, as well as a wide range of filters, silencers and instrumentation.
