

Advanced flare technology. Total package solutions.

- Up to 6000 scfm in a single flare.
- 10:1 or greater turndown without external adjustments.
- Single inlet connection. No burner "staging" required.
- Low inlet pressure capabilities, down to 2" water column at maximum flow rate.
- Ultra-low emission designs.
- Control panels designed to interface with any plant "DCS".
- "Anti-flashback" burners for additional protection.
