Elmo Rietschle
A Gardner Denver Product

Dry running rotary vane compressors

Volume flow from 10 to 30.7 cfm, pressure up to 14.5 psig. With integral suction paper filter. Sound cover reduces noise level, enhances cooling and protects operator from mistakenly touching hot surfaces. Flexible connections possible, vibration free, easy to operate, maintain and install.

Compresor de paleta rotativa de funcionamiento en seco

Caudal volumétrico de 10 a 30.7 cfm, presión de hasta 25.5 in. HgV. Con filtro de succión de papel integrado. La cubierta amortiguadora de sonidos reduce el nivel de ruido, mejora la refrigeración y protege al operador del contacto accidental con superficies calientes. Admiten conexiones flexibles, sin vibraciones, fáciles de operar, mantener e instalar.

cfm* Capacity (Volume flow) refers to free air at 1 standard atmosphere and 20° C (68° F) • *La capacidad (Caudal volumétrico) se refiere a aire libre atmosférico a 1 bar (abs.) y 20° C (68° F)*

dB(A)** at medium load, inlet and discharge connected to a pipeline • *a la carga medio, la entrada y descarga conectaron a una tubería*

Curves, tables content (tolerance ±10%) refer to compressor at normal operating temperature. • *Las curvas, las tablas (tolerancia ±10%) hacen referencia a un compresor a temperatura normal de funcionamiento.*
